

CPX Pump station 400L D600

Complete pumping station for volumes up to 400L including pumping well with cover, submersible pump with float and internal piping. Pump capacity 180l/min

The pumping station is delivered ready for use, for example for surface water drainage or for pumping wastewater after septic tanks in the case of a backflow for enhanced infiltration. Lockable, child-proof cover of the same type as for our underground tanks included.

Attention! The pump is not designed for direct discharge of wastewater (black water) from the property, the sludge must first be separated in a septic tank.

Straight surfaces around the entire pumping well provide a tight seal together with the supplied rubber sleeve for the inlet connection. The outlet, a PEM-coupling Ø32mm, is pre-drilled at a height of 915mm.

Made from 100% recycled polyethylene.

Art.nr: 450331

Approximate size

Specifications	
Material	PE
Lid type	
Color	Black
Volume (L)	400
Height (mm)	1330
Diameter (mm)	600
Weight (kg)	48
Tollstatistical code	3926909790
GTIN	7090046760986
Delivery packaging	2 pcs./pallet

Characteristics

Customizable containers

Recyclable

Wide temperature range

Chemical resistance

Leak test

Logistics solutions

Easy to clean
