

CPX Closed tank 3000L RM

The tank's sturdy design means that it can be installed both above ground and underground. The CPX 3000 litre closed tank is also suitable for vacuum toilets. This model is slightly narrower than the usual 3 000 litre tank.

This tank is made from at least 80% recycled material (post-industrial) and thus has approximately 35% lower carbon footprint than a corresponding product made from non-recycled material. The tank has therefore not been tested safe for drinking water.
